## SOFTWARE DEVELOPER

## About me

---

Full-Stack Developer with experience in creating secure, production-ready web applications utilizing Django, PostgreSQL, Docker, and modern frontend technologies. Currently pursuing BSc in IT while delivering scalable solutions across the full stack. Proficient in DevOps practices, networking, and system security, with experience integrating tools such as WireGuard VPN, Nginx, and CI pipelines. Recognized for adaptability and ability to manage projects independently in dynamic environments.

## Experience

---

### Software Developer

*Holt Consulting (Pty) Ltd*  
12/2024 - Present

- **Full-Stack Development:** Designed and built a secure web-based CRM system using Django and PostgreSQL, including modules for customer, stock, lead, and quotation management, with PDF generation via WeasyPrint.
- **Security & Infrastructure:** Implemented role-based access with invitation based onboarding and WireGuard VPN; deployed using Docker on DigitalOcean with Nginx, Unicorn, and HTTPS (Let's Encrypt).
- **Frontend & DevOps:** Integrated a responsive Bootstrap 5 UI; managed source control and production deployments via Git, with automated migrations and static asset handling on Ubuntu Linux.

## Education

---

### (2023–Present) BSc, Information Technology

*North-West University*  
(Potchefstroom, South Africa)

### (2018–2022) High School

*Sasolburg High School*  
(Free State, South Africa)
